

What Does Global Fee Mean?

Urgent Care at Peachtree offers a “global fee” for all patients. This is a simplified fee structure with one price covering everything. Regardless of how many different things we have to do to treat you, we won’t increase your cost. This doesn’t include major outside tests or lab work, but it does include everything that we provide at our urgent care. This is especially beneficial for people who have high health insurance deductibles. For example:

You are injured, but it’s not life-threatening.
You definitely need stitches and/or x-rays, though.

You need to see a Doctor as soon as possible, and you have a high deductible on your health insurance. Your choices are:

<p>Hospital ER</p>	<p>You’ll have a long wait (likely hours) PLUS fees in the thousands because of separate charges for Nurse, Doctor, labs, x-rays and suturing/casting.</p>
<p>Primary Care Physician</p>	<p>If it’s after hours, you can’t see your regular Doctor, but if you could, they would likely have to send you somewhere else for labs and x-rays, which costs extra.</p>
<p>Pharmacy Clinic</p>	<p>Pharmacy clinics don’t have Doctors, labs or x-rays, are usually not open evenings or Sundays and can’t help with suturing/casting. For other minor illnesses, they are typically the same cost as Urgent Care at Peachtree.</p>
<p>Other Urgent Care Clinic</p>	<p>If the urgent care is open, you may be seen by a Nurse, a PA or a Doctor. You will likely be charged much more for the basic visit and hundreds more for separate labs, x-rays, suturing/casting fees.</p>
 <p>Local ER Doctors Owned and Operated 678-805-7425 UCatPeachtree.com</p>	<p>We are open 9am to 10:30pm weekdays and 10am to 10:30pm weekends. You’ll have a short wait, and your bill could be just \$130 total (that’s our average “global fee”) even though you see a Nurse AND a Board-Certified ER Doctor, have lab tests, x-rays and suturing/casting. And, with our extensive referral network, if you need to see a specialist, we know the best.</p>
